

Congress of the United States
House of Representatives
Washington, DC 20515-4006

April 27, 2021

Dear Chair DeLauro and Ranking Member Granger:

I am requesting funding in fiscal year 2022 from the Subcommittee on Transportation, Housing and Urban Development and Related Agencies, under the Economic Development Initiative account, for the following project:

Greater St. George Wastewater Project

The entity to receive funding for this project is:

County of Dorchester
201 Johnston Street
St. George, SC 29477
SC-06 Congressional District

The funding would be used to provide a wastewater collection and treatment system to disadvantaged areas not currently served by a public utility. Funds would be used for the construction of three new pump stations and a new force main in Dorchester County, SC.

This project is an appropriate use of taxpayer dollars as it would provide wastewater collection and treatment in areas not currently served by a public utility. In addition to improving sanitary conditions for residents, the new infrastructure will prevent the discharge of untreated wastewater into streams and wetlands in the area and would help foster residential, commercial, and industrial development, thereby creating jobs and promoting economic mobility for low-income residents there.

I certify that neither I nor my immediate family has any financial interest in this project.

With kindest regards, I am

Sincerely,

James E. Clyburn
Member of Congress (SC-06)
